International Technology Transfer Consortium, or ITTC in short

ITTC supports global technology transfer with three pillars of support:

1. Support of Manufacturing Human Resource Development:
2. Support of Dispatch in Technical Human Resources:
3. Support of Sales Channel Development of Technical Products.

Support of Manufacturing Human Resource Development

Monozukuri Nihongo Kentei Kyokai (MNKK)

"Japanese-style Manufacturing" is the manufacturing philosophy in the broad sense that is applicable to any works, regardless of whether they are in a manufacturing industry or in a nonmanufacturing industry.

We provide and support, in multiple languages, a series of activities for planning, developing and designing products in order to provide goods and services with function, quality and price of high customer satisfaction and add additional values in production, procurement and sales according to this philosophy and technology.

Support of Sales Channel Development of Technical Products

Japan Engineers Federation (JEF)

We realize sales channel development of technical products as well as support vitalization and acceleration of technology transfers to emerging and developing countries by distributing in video forms the "manufacturing culture" of Japanese SMEs to both domestic and Asian and African markets via Global Internet EXPO (GIX) operating on the innovation video platform of "Web Knowledge Xpo (WKX)".

Support of Dispatching Technical Human Resources

Japan Researcher's Network (JRN)

Intellectual property human resources are defined as those professional experts with sophisticated capability of research and technical development, active domestically or globally in order to realize the creation of required intellectual property innovation. We support mobilization of stagnant intellectual property human resources by means of letting researchers and engineers demonstrate their attractiveness.
