Former Professor of TOHOKU UNIVERSITY

Message:

Japan Engineers Federation (JEF) had dispatched the business mission to Myanmar to visit government entities of Myanmar and power facilities on December 2012. Also JEF had held "Myanmar / Japan Joint Forum on Electric Power Development 2013" in October 2013. In the promotion of medium and long-term plan related to the power developments in Myanmar, measures of emergencies and short-term problems will be required immediately in Yangon region. The purpose of the forum was to provide the background informations for installation, operation and maintenance of products and systems made by the manufacturing companies and the power companies of Japan, to the engineers and executives of Ministry of Power of Myanmar, who will require such countermeasures.

On the basis of the above, JEF is going to hold " Myanmar / Japan Joint Forum on Gas Turbine Combined Cycle Technology " with the cooperation of the Ministry of Electric Power, Republic of the Union of Myanmar, and other authorities concerned. We believe that the forum will be useful for your company and associations. We welcome you participating to the forum from the bottom of hearts.

If you intend to participate to the forum, please fill out the application form and send it to us by E-mail or FAX before September 17.
